

<p>Mr Singh Gurdwara Guru Hargobind Sahib Britannia Street Oldbury B69 2PG</p>	<p>Proposed community centre, parking and associated works (revised application DC/17/61185), and demolition of existing Gurdwara Guru Hargobind Sahib building on Dudley Road West to provide additional off site parking. Gurdwara Guru Hargobind Sahib Car Park Upper Chapel Street And Gurdwara Guru Hargobind Sahib Building Dudley Road West Tividale Oldbury</p>
--	--

Date Valid Application Received: 24th May 2019

1. Recommendations

Refusal:

- i) The proposal is a departure of the Council's adopted Local Plan
- ii) Insufficient off-street parking having a detrimental impact on highway safety, and
- iii) Contrary to the Council's separation distances, resulting in the loss of light and outlook to residents of Acacia Close.

2. Observations

This application is being brought to the attention of your Committee at the request of Councillor Downing.

The Application Site

The application site relates to the car park of the Gurdwara Temple located on the northern side of Upper Chapel Street

adjacent to the Birmingham Canal. The area is a mixture of industrial units with residential properties to the west.

The application site is allocated on Local Employment Land, and as such, this application is a Departure from the Council's adopted Local Plan, and if approved would have to be reported to Full Council for consideration.

Planning History

The land to which the application relates was formerly an area of open land and was granted planning permission in 2010 (DC/10/52857) for conversion to a car park alongside an application for the temple.

A further application was submitted in 2012 (DC/12/54554) to alter the car park further by providing additional spaces.

In 2018, Planning Permission was refused by your Committee for a community centre (DC/17/61185) on part of the site for the following reason:

The proposal would result in insufficient car parking to the detriment of the safety and convenience of the users of the highway.

The applicant in an attempt to address the reasons for refusal now proposes to demolish the former Gurdwara on Dudley Road East (approximately 300m from the site of the proposal), creating 12 off-street parking spaces.

Parking Spaces History

Putting the issue over parking spaces into perspective;

- i) In 2010 a new Gurdwara (DC/10/52857) was approved with **58** car parking spaces,
- ii) Due to the parking demand, a further application to expand the car park (DC/12/54554) was approved resulting in **93** spaces,
- iii) In 2018 Planning Committee refused a similar proposal before you now based on **68** spaces,
- iv) The current application (DC/19/63157) proposes a total of **90** car park spaces for both the proposed community centre

and the existing Gurdwara. This is a reduction of three spaces since the 2012 application whilst introducing an additional use.

Current Application

The current proposal is for a new community centre with associated works. This would be located on the western side of the car park near to the rear garden boundary of residential properties on Acacia Close. The proposal would measure 35.0m (L), 10.0m (W) with a maximum height of 6.4m.

The proposed opening hours are 09:00 to 18:00 hours Monday to Saturday with no opening on Sundays. The proposed Community Centre would hold up to 150 people.

The Gurdwara that would share the use of the car park, has restricted hours that are limited to;

Monday – Friday; 05:00-21:00 hours

Saturdays; 24 hours

Sundays and Bank Holidays; 12:00 – 21:00 hours

Therefore, both sites have the potential to operate at the same time whilst sharing the same parking provision.

Publicity

The application has been publicised by neighbour notification letters, site and press notices. 18 objections (one of which is a petition of objection containing 186 signatures) and one letter of support has been received. The reasons for either objecting or supporting this application are as follows;

Objections

- i) The car park is currently at capacity with cars over spilling on to the highway when the Gurdwara is in use;
- ii) The side roads are constantly busy, with local businesses, parents undertaking the school run and residents parking;
- iii) The Gurdwara and the Community Centre could be open on the same day and time – causing significant highways issues, and potentially causing conflicts between the end users and the existing residents;

- iv) Concerns have been raised that the current tree buffer would be removed and residents would look out onto the roof of the proposed community centre;
- v) The proposal does not look to be for a community use. There is the potential for the site to be used as a banqueting suit, and potential for parties given the large room proposed;
- vi) The building would create an “alleyway” resulting in waste land between the community centre and the rear boundaries of the houses in Acacia Close;
- vii) The building would cause a significant loss of light to properties in Acacia Close,;
- viii) Concerns have been raised over the safety of the building on Dudley Road West as the objector shares the party wall of the building to be demolished, where his business operates;
- ix) The Gurdwara already has a community centre attached, why is there a need for another;
- x) The privacy of residents of Acacia Close will be compromised.

Support

One response has been received in support of the application and states;

The community Centre will provide tremendous support to all members of the local community from all backgrounds...

...The Gurdwara has worked hugely with the neighbouring Primary School. As stated on Tividale Primary Schools' website (newsletter September 2014); When the Gurdwara's current car park is least used; the Gurdwara has offered parking for parents collecting children from the local primary school which helps ease parking problems on the main road and helps deter hazards as well as more safety for Children.

If possible, current plans to develop a car park on Dudley Road West can also provide further assistance to neighbouring businesses. The car park can be utilized by neighbouring businesses on Dudley Road West When the car [park] is least used by the applicant...

Responses to objections

I respond to the objector's comments in turn;

- i) Photographic evidence has been provided by the residents to demonstrate this which has also be corroborated by independent surveys undertaken by Highways which indicated that there would not be sufficient parking;
- ii) Photographic evidence has been provided by residents that nearby roads are already congested;
- iii) It is accepted that the highway issues would occur if both uses operated at the same time;
- iv) The Council's 14m separation distances relates to two-storey buildings. The proposal is single-storey and measures approximately 11m away. However, combined with the size of the building and level changes, the proposal would have the impression of a two-storey building when viewed from the rear of the properties in Acacia Close, and therefore would be contrary to the Council's adopted Residential SPD;
- v) It is the opinion of the Council that a condition preventing banqueting uses would be difficult to monitor and enforce;
- vi) The alternative would be to push the building back towards resident's properties in Acacia Close, further reducing the separation distances;
- vii) The proposal lies east of the properties in Acacia Close, therefore any potential loss of light would only be significant in the morning;
- viii) Noted, however party wall matters are not a material planning consideration;
- ix) It is noted that a community facility already exists but this is not relevant to the proposal and;
- x) There are no windows proposed on the western elevation, therefore I do not consider that the proposal would cause a loss of privacy.

Statutory Consultee Responses

Environmental Health (Air Quality)

Given the size of the building, there is no requirement for a detailed air quality assessment. However, if approved, details and implementation of electric charging points, a transport assessment and travel plan demonstrating the mitigation of air

quality impacts associated with the development should be conditioned.

Environmental Health (Contaminated Land)

Concerns have been raised over the potential historic contamination of the site. As a result, the Council's Environmental Health Team require the standard ground remediation works condition on any approval.

Environmental Health (Air Pollution and Noise)

Noise

No objections due to no windows on the elevations and the limited hours of use would not impact on the nearby residents.

Odour

If approved, conditions regarding extraction equipment details (included plant equipment) and construction/deliveries times are conditioned.

Planning Policy

Object as they believe the applicant has not overcome the previous reasons for refusal and that the proposal is still a departure from the adopted Local Plan.

Highways

Objections received. A total of 98-113 off-street parking spaces are required. 89 spaces are proposed, meaning there is a shortfall of 9-24 spaces. The Council's Highways Department recommends that the whole of the carpark is retained for the existing use.

The above has been relayed to the applicant's agent who, at the time of writing this report, is yet to dispute the concerns of the Council's Highways Department.

Transport Policy

Details of cycle parking should be provided and should be located near to the main entrance of the building to encourage sustainable travel.

Healthy Urban Development Officer

Encourages users to arrive by alternative means other than a motor car.

Access Alliance

Issues raised are covered by other legislation.

Canal and Rivers Trust

Concerns have been raised over the potential for littering and anti-social behaviours, impact on the watercourse from traffic and pollution. Conditions have been recommended to address these concerns.

Cadent

Comments received are not planning related, but these have been passed onto the applicant's agent for information.

Planning Policy and Other Material Considerations

Planning Permission was refused in 2018 for the following reason;

The proposal would result in insufficient car parking to the detriment of the safety and convenience of the users of the highway.

No appeal has been lodged subsequent to this decision.

For the current application, the applicant has slightly moved the location of the proposal and included additional land, and as such, the application is treated as a new scheme.

In the first instance, it is considered that the proposed community centre is of a suitable design and accords with relevant design

policy ENV3 Design Quality and SAD EOS9 Urban Design Principles. However, the proposal does not comply with the Council's adopted 14m separation distance, contained within the Council's adopted Supplementary Planning Document – Revised Residential Design Guide.

SAD DM6 refers to community uses being situated either on main road frontages or on the fringe of commercial areas, particularly district or local centres. The policy also indicates parking provision associated with development is a key consideration. In the first instance, the proposal is situated on the fringe of a residential area, secondly the objectors have provided evidence to suggest that currently the existing car park which serves the Gurdwara is at capacity and vehicles are often parked on the highway. The Head of Highways has also objected on this basis and on their own assessments and knowledge of the site. Paragraph 109 of the adopted National Planning Policy Framework states;

Development should only be prevented or refused on highways grounds if there would be an unacceptable impact on highway safety, or the residual cumulative impacts on the road network would be severe.

Evidence has been provided from residents and Council officers that significant harm would be created, resulting in a severe impact on the road network.

Turning to residential amenity, it is anticipated that the proposal would result in significant harm to neighbouring residential property by reason of loss of light, and outlook.

Furthermore, the applicant has failed to demonstrate why the Council should set aside the Council's Local Plan allocation in this instance, and no alternative sites have been identified or reasons why other sites have been discarded.

Conclusion

The proposal would result in removal of an aspect of the car park which would result in insufficient car parking being provided for the existing temple and the proposed centre. This would be to the detriment of the users of the highway. The proposal is contrary to adopted policy in terms of separation distances, and is a departure of the adopted Local Plan.

Refusal is therefore recommended.
