

REPORT TO PLANNING COMMITTEE

4th December 2019

Application Reference	DC/19/63297
Application Received	10 th July 2019
Application Description	Proposed development to provide 2 No. units comprising of Industrial process (Class B1c), General Industrial (Class B2), Storage or Distribution (Class B8) with ancillary offices, car parking, landscaping, service yard areas, and associated external works
Application Address	Land Adj To Asda Wolverhampton Road Oldbury
Applicant	Canmoor (Oldbury) Ltd C/o Agent Michael Sparks Associates Units 11 And 12 Plato Place 72-74 St Dionis Road London SW6 4TU
Ward	Langley
Contribution towards Vision 2030:	
Contact Officer(s)	Alison Bishop 0121 569 4039 alison_bishop@sandwell.gov.uk

RECOMMENDATION

That planning permission be refused on grounds that:-

- i) The proposal would give rise to severe highway safety issues due to insufficient information being provided in relation to traffic generation and insufficient parking within the site and the proposed pedestrian/cycle route would not provide appropriate sustainable travel opportunities to access the site and is therefore contrary to TRAN 2 Managing Transport Impacts of New Development;

- ii) The proposal would result in harm to residential property by virtue of loss of outlook due to the proximity, mass and height of the buildings having an overbearing effect on the nearest residential properties and being contrary to Policies ENV3 Design Quality and SAD EMP 4 Relationship between Industry and Sensitive Uses EOS9 Urban Design Principles.
- iii) The proposal footpath link would have a detrimental effect on the amenities of the adjoining property 131 Titford Road by virtue of noise and disturbance due to the proximity of the footpath to their property.

1. BACKGROUND

- 1.1 This application is being reported to your Planning Committee because the proposal has generated a high volume of objections.
- 1.2 Members visited in October, however the application was subsequently deferred due to further assessments being required and subsequent consultation with statutory consultees. Final submissions and consultation responses have been received which now enables a full report and recommendation to be made to your committee.

2. SUMMARY OF KEY CONSIDERATIONS

- 2.1 The Site is allocated for employment land and forms part of a wildlife corridor.
- 2.2 The material planning considerations which are relevant to this application are:

Government policy (NPPF)
Proposals in the Local Plan
Overlooking/loss of privacy
Loss of light and/or outlook
Overbearing nature of proposal
Design, appearance and materials
Access, highway safety, parking and servicing
Traffic generation
Noise and disturbance from the scheme
Air quality/pollution
Nature conservation and loss of ecological habitats
Flood risk
Safety and security

3. The APPLICATION SITE

- 3.1 The application site relates to land between Asda, adjacent to junction 2 of the M5, and the west of Titford Road, Oldbury.
- 3.2 The residential properties on Titford Road back directly onto the site which presently is a private green space which contains a number of self setting trees and shrubs. A water course also runs through the site along the north and western boundary.

4. PLANNING HISTORY

- 4.2 The site is situated on undeveloped land which was historically used as allotment gardens. Whilst there has been a subsequent application for additional car parking to serve the existing Asda store, this was refused in 2004 and no further applications have been received.

- 4.3 Relevant planning applications are as follows:-

DC/03/41246	Proposed additional car parking	Refused 29.09.2004
DC/20712	Change of use to car parking in connection with U.K. Car Auction business.	Approved with Conditions 17.11.1986

5. APPLICATION DETAILS

- 5.1 The applicant proposes to construct two industrial units which would be marketed for Light Industry (Class B1c), General Industrial (Class B2), Storage or Distribution (Class B8). Access would be gained from the roundabout serving Asda and Junction 2 (M5). The units would be situated adjacent to the boundary with the gardens of Titford Road being between 5 metres and 10 metres from this boundary. Trees would be retained and further tree planning would be incorporated along this boundary. The units would measure 76 metres (W) by 45 metres (L) by 11 metres (H) (Unit 1) and 57 metres (W) by 45 metres (L) by 11 metres (H) (Unit 2). Ancillary offices would be attached to each unit with associated servicing beyond to include HGV parking and 62 car parking spaces. It should however be noted that a parking layout have also been provided to showing a maximum of 163 spaces.

The proposal is accompanied by a Planning Statement, Design and Access Statement, Tree Survey, Ecology appraisals, a Transport Statement, Travel Plan, Air Quality Assessment, Noise Assessment and Environmental Impact Assessments.

- 5.2 The Planning Statement refers to national policy which encourages sustainable development comprising creating a strong economy, achieving strong, vibrant and healthy communities and protecting and enhancing the natural and built environment. Further clarification is provided within Black Country Core Strategy which identifies targets for delivering land and jobs for industrial and warehousing in the Black Country by 2026. The statement also refers to the site being allocated as employment land with the Sandwell's Site Allocation and Delivery Plan Document (SAD EMP1) and considers that this site provides an opportunity for job creation within an existing transport network and that harmful impacts can be mitigated through the layout, namely providing a buffer to the River Tame and retention and introduction of additional planting to include trees.
- 5.3 The Design and Access Statement illustrates that the orientation of the building has been designed with the service yard away from nearby residential properties to screen noise with the retention and increase of trees to form a landscape buffer. In addition, the building's location provides an office element to introduce interest and natural surveillance together with adequate areas for car parking, servicing and manoeuvring.
- 5.4 The preliminary ecological survey was undertaken in July 2018 and notes that the site is not covered by any statutory or non statutory wildlife designations but is identified as a Potential Site of Importance. The survey found that the site was dominated by habitats which were of low ecological value. Recommendations within the report included a 5 metre buffer to the River Tame, minimal light spillage to the River Tame and that site clearance should take place under the supervision of an ecologist and outside the bird nesting season. In addition, should any hidden badger setts be encountered, these should be closed under of Natural England licence.
- 5.5 The Transport Statement states that the site provides appropriate provision for car and cycle parking and is well served by a good network of pedestrian, cycle and public transport links. Furthermore the proposal will not impede the free flow of traffic and a Travel Plan has been produced to encourage sustainable travel patterns.
- 5.6 The Air Quality Assessment has predicted a minor to major adverse impact during construction activities, however during construction of the development, mitigation measures such as a construction management plan are recommended. On implementation of the scheme, it is stated that the additional vehicle movements would not cause a significant impact on local air quality.
- 5.7 Noise Impact has been assessed against the proximity of the residential properties to the south east on Titford Road and the School to the north

east and the surveys have indicated that the noise levels fall below those deemed to be adverse under relevant guidance, Other mitigation referred to a noise barrier along the south west boundary of the service yard area.

- 5.8 Flood Risk and Drainage has been considered and the drainage strategy incorporates porous pavements to the parking areas along with attenuation tanks to mitigate surface water flooding.
- 5.9 A tree survey has been undertaken, mindful of the wildlife corridor designation, existing vegetation would be retained where possible, together with replacement of removed trees and additional planting (163 trees in total) in order to enhance biodiversity.

6. PUBLICITY

- 6.1 The application has generated a large number of objections, firstly 47 individual letters have been received along with an online petition which includes 20,545 signatures. A folder containing all the campaigning and responses from residents which was submitted by the head petitioner has been attached to this report. In addition, following the further consultation three further objections have been received. Any further objections will be reported to your meeting.

6.2 Objections

Objections have been received on the following grounds:-

- (i) Flooding Issues – historic flooding occurs to the gardens and basements of properties on Titford Road and this proposal will exacerbate matters.
- (ii) Loss of Wildlife and destruction of the wildlife corridor, the primary school utilises the area for valuable forestry lessons. The surveys do not reflect the presence of bats, birds, foxes, reptiles and other species on the site.
- (iii) Increase in traffic.
- (iv) Loss of privacy/light and outlook due to the site levels, proximity and height of the building.
- (v) Litter.
- (vi) Noise from traffic and the activities associated with the warehouses (24/7 operation) given that Birchley Island and the nearby streets are already congested. Currently the wildlife corridor acts as a buffer to the noise from Asda and the M5 Motorway.
- (vii) Traffic flow will be impeded as the Asda island is small and this could result in congestion and impeding the exit for the Fire Station.
- (viii) Vibration from the proposed use, already experience works associated with Asda.

- (ix) Air Quality/pollution will increase due to the loss of greenery and increase in traffic – impacting on residents and the school.
- (x) Poor design.
- (xi) Out of character with surrounding area.
- (xii) Work commenced on site clearance without permission which has destroyed part of the wildlife habitat.
- (xiii) Other vacant industrial site should be considered rather than building on this green space.
- (xiv) Antisocial Behaviour/security of residential properties.
- (xv) The revised footpath link will have detrimental effect on the immediate bungalow resulting in noise from users walking directly past their kitchen window and making them vulnerable to vandalism;
- (xvi) The revised footpath could introduce anti-social behaviour along with an increase noise and loitering, incidents of drug dealing have occurred previously taking place.

The effect on property values and boundary issues are not material planning considerations

6.3 Responses to objections

I respond to the objector's comments in turn;

- (i) Flooding Issues – Whilst it is recognised that properties suffer from historic flooding, the proposal included a flood risk assessment and drainage strategy which both the Environment Agency and the Lead Local Flood Authority have confirmed will ensure that flooding is not exacerbated in the area. Therefore surface water run off from the site can be conditioned and flooding will not be affected as the scheme provides an 8 metre buffer from the water course.
- (ii) Loss of Wildlife and destruction of the wildlife corridor – The site is currently not designated but does form part of a wildlife corridor, albeit it has been flagged as a Potential Site of Importance (PSI). As a wildlife corridor, this does not preclude development but requires appropriate measures to be provided to protect the flow of wildlife through the site. The 8 metre buffer along the River Tame will, in part, enable this to take place along with the introduction of additional tree planting and sensitive lighting. The Wildlife Trust considered that the preliminary ecology report was insufficient and a full assessment should have been undertaken given its PSI status. I am advised that little weight can be attached to the PSI designation, the Black Country Core Strategy review is currently in progress and survey work has been undertaken to determine whether future sites require formal designation as either Site of Importance for Nature Conservation (SINC) or a Site of Local

Importance for Nature Conservation (SLINC), this site was not included within this review.

- (iii) Increase in traffic – the proposal will create additional trips and concerns have been expressed by Highways regarding the assessment undertaken and the potential impact on the road network around Birchley Island and access and parking within the site.
- (iv) Loss of privacy/light and outlook due to the site levels, proximity and height of the building.
Privacy – there are no windows proposed on the rear elevation facing residential properties, so there will be no overlooking issues.
Outlook/light - The building height equates to a 3 storey building and the interface distances, at the pitch point in the centre of the site, is 21.5 metres which shorter than those required namely 27.5 metres as stated in the revised residential design guide SPD. It is accepted that the proposal introduces additional screening with trees, however these are deciduous, so views will not always be obscured and the trees will take 10 years to mature and create an effective screen. I am therefore concerned about the imposing nature of the building in such close proximity to neighbouring properties.
- (v) Litter – the introduction of the new pedestrian link from Titford Road could result in some litter, however a pedestrian gate has been indicated which could control access and hence the responsibility for maintaining the path will fall in the control of the occupiers of the site. With regard to the wider site, I do not envisage that litter would cause an issue to residents given that the building screens the service yard and parking areas from their properties.
- (vi) Noise from traffic and operations – Environmental Health have no objection subject to limiting noise levels, an acoustic fence and preventing manoeuvring beepers during the night time.
- (vii) Traffic flow will be impeded – The Highways service share these concerns regarding the volume of traffic and the shortfall of parking within the site for certain uses.
- (viii) Vibration from the proposed use – It is accepted that vibration could be of concern, if the future end users operate presses or heavy machinery, such matters would need to be conditioned and further vibration reports required for certain uses.
- (ix) Air Quality/pollution – The Air Quality Assessment has shown that the pollution levels will not be significant and that mitigation could

offset the marginal increase such as encouraging sustainable travel, electric vehicle charging points and other measures calculated by the damage cost calculation (see 7.8 below).

- (x) Poor design – the proposal is for a relatively standard industrial building excepting some additional detailing to the office element. The urban design officer had requested that some natural breaks in the roof would improve its design whilst also reducing the impact on the residents of Titford Road. The most recent layout showed a reduction in the roof height by 1 metre, however this is considered to be too marginal to reduce the impact on the residents to an acceptable level.
- (xi) Out of character with surrounding area – the area is a mixture of different uses, accepting that residential is to the south of the site to the north is the M5 and Birchley island which is commercial with the Asda Store to the west and the school to the east. Therefore the proposal would not be wholly out of character with the surrounding area.
- (xii) Work commenced on site clearance – it is accepted that some site clearance took place to necessitate survey work to inform the planning application, I am satisfied that these works did not require planning consent.
- (xiii) Other vacant industrial site should be considered – whilst I accept that there are other vacant sites within the borough, the site is allocated for employment use and hence there is no requirement to undertake a sequential test of other sites.
- (xiv) Antisocial Behaviour/security – West Midland Police had no objections to the proposal accepting that the scheme should incorporate secured by design measures.
- (xv) Noise/anti-social behaviour from the revised footpath – the proposed footpath indicates a gate to the frontage but does not indicate how the footpath will be enclosed. Given that the nearest bungalow at 131 Titford Road has window serving their kitchen on the side elevation, I consider that the occupiers will suffer from disturbance particularly given that the proposal is for a 24/7 operation. Furthermore if the access is not controlled then the area would be vulnerable to anti-social behaviour.

6.4 Support

No comments have been received which support the application.

7. STATUTORY CONSULTATION

7.1 Planning and Transportation Policy

The site is allocated as local quality employment which states that these areas should be safeguarded for industrial and warehousing development. The site also forms part of a wildlife corridor and hence under policy ENV1, the movement of wildlife should not be impeded as part of the proposed development (refer to comments below 7.7). Other relevant policies are limiting flooding and sustainable drainage (ENV5) see comments below 7.6, Air Quality (ENV8) see comments below 7.8

The application is also supported by a travel plan which aims to introduce a package of measures to encourage staff to travel to work by sustainable modes (i.e. walking and cycling), however the cycle/pedestrian routes proposed from Titford Road is on 1.8 metres wide. Cycling guidance states that these routes should be 3 metres wide to allow for passing and therefore the route is considered to be unacceptable in its current form. In addition, the cycle parking is in the wrong location (i.e. away from the main entrance and close to natural surveillance).

7.2 Healthy Urban Development Officer

The concerns expressed regarding walking and cycling are shared, in particular that the most sustainable bus route being the No 4 is accessed from Birchley Island which is poorly served with pedestrian routes to the site. Therefore the transport statement and travel plan should be revisited.

7.3 Highways

Highways are unable to support the proposal largely due to the speculative nature of the development for B1c, B2 and B8 uses. They have stated that they have questioned the data provided, which is based on assumptions given that there is no end user and it is therefore impossible to accurately determine the likely impact the development will have on Birchley Island. Highways have therefore considered the worst case scenario for trip rates and parking accumulation.

Trip rates - The applicant has failed to provide adequate information on the proposed generated traffic flows and their distribution through both Sandwell's and Highways England network to sufficiently determine if the effect on the worst case development would have a detrimental or severe impact on that network. As Birchley Island runs near capacity most days,

the test of severity here is not the additional percentage of traffic going through the junction but rather one of if the proposed peak time traffic from the development tips the balance on the island and causes major congestion. The worst case scenario would be potentially 209 cars and HGV traffic arriving and departing at peak times.

Parking - A B2 use would require 247 parking spaces, however following evidence from the applicants it was agreed that a maximum of 209 spaces should be provided. The original scheme showed parking for 62 cars, however a revised parking layout have demonstrated that a maximum of 163 spaces could be provided, but with further access widening this could reduce to 160. Therefore Highways have estimated that there will be a shortfall of 49 spaces in the worst case scenario.

7.4 Highways England

A further assessment was submitted and consultation has taken place with Highways England, however their response is still awaited.

The further assessment relates to:-

- the assessment of traffic flows around Junction 2 (M5) vehicular movements to and from the site;
- turning movements to access the site for HGVs and a swept path has been requested;
- proposed pedestrian and cycle access;
- additional information regarding drainage details.

An update will be provided at your meeting.

7.5 Environment Agency

Following further clarification regarding the proximity of the development to the watercourse, and the bridge crossing the water course to the new development, the Environment Agency removed their objection. The scheme now shows an 8 metre clearance from the main river channel and so the whole development falls with flood zone 1 (low risk of flooding). With regard to the bridge, they have set parameters for the level of the bridge and state that the detail can be dealt with via the Environmental permit regulations.

7.6 Lead Local Flood Authority

No objections from the LLFA subject to conditions limiting the surface water run-off to 10.2 litres per second which would include the provision of attenuation flood storage, water treatment and management/ maintenance of the installed system.

7.7 Birmingham and Black Country Wildlife Trust

The wildlife trust have stated that the site is currently recognised as part of the Tame Valley Potential Site of Importance which whilst mainly being the river itself also includes areas of open space which are key stepping stones along the river corridor. They consider that further consideration should be given to whether the site is a Site of Importance for Nature Conservation (SINC) or a Site of Local Importance for Nature Conservation (SLINC), in particular they consider that the assessment undertaken by the applicant's appointed Ecologist would merit at least a SLINC status and as such the habitat included within the site should be provided the ecological significance and mitigation to reflect this. Therefore the wildlife trust have stated that they would still wish to seek a full ecological assessment which included detailed and confirmed proposals for avoidance, reduction, mitigation and compensation to be provided within the proposed development.

With regard to the lighting strategy they have stated that no details have been provided to demonstrate how the local bat population would be protected.

7.8 Environmental Health (Air Quality)

The proposal requires types 1, 2 and 3 under the Black Country Air Quality SPD, namely electric vehicle charging points, a low emissions strategy and a damage cost calculation with appropriate mitigation. They have made the following comments and conclusions on the Air Quality Impact Assessment:-

- (i) It is based on traffic data, but given the uncertainty of the proposed end user, this could be an under prediction in traffic movements and a lower damage cost calculation value (note this value then amounts to the number of measures that need to be put in place to offset the damage cost).
- (ii) There are negligible risks from construction impacts.
- (iii) The operational impacts would not be significant on local PM₁₀ concentrations (particulate matter/concentrations)
- (iv) The damage limitation cost has been calculated at £57,412 and should be spent on measures aimed at mitigating air quality
- (v) Conditions are recommended to include an Earthwork/construction mitigation plan; introduction of the electric vehicle charging points (stated to be 63.5% of the car parking area) and the submission of a low emissions strategy which equates to the calculated damage

limitation cost in (iv) above but this would subject to the end users and the correct calculation for traffic movement.

7.9 Environmental Health (Contaminated Land)

No objections subject to conditions requiring site investigation and remediation (if required).

7.10 Environmental Health (Air Pollution and Noise)

The proposal is close to residential property on Titford Road and this could result in an adverse impact in relation to exposure from noise associated with the proposed development. They have therefore recommended conditions relating to restricting the noise levels from the use/s to include restricting night time operations along with preventing bleeper being used during the night time for HGVs.

With regard to lighting, they do not consider that this will impact on the residents of Titford Road.

7.11 Urban Design

The proposed façade to the rear of the residents on Titford Road, being a large expanse of continuous solid mass of roof for 90 metres at a height of 11 metres will have an overbearing impact on residential amenity, particularly for houses 139-183 Titford Road, where interface distances are only 21.5 metres from the site.

7.12 West Midlands Police

No objections but it is recommended that the development incorporates secure by design measures to reduce crime.

7.13 Severn Trent

No objections subject to conditions relating foul and surface water disposal.

7.14 Coal Authority

There are no objections. The Coal Risk Assessment accompanying the planning application has recommended intrusive site investigation to determine the exact ground conditions. This is considered to be an acceptable approach given that the majority of the site falls outside a high risk area.

7.15 Canal and River Trust

No objections.

7.16 Health and Safety Executive

The site lies within the Solvay Middle Zone, however the HSE do not advise against the grant of planning permission.

8. GOVERNMENT GUIDANCE/NATIONAL PLANNING POLICY

- 8.1 National Planning Policy Framework promotes sustainable development but states that that local circumstances should be taken into account to reflect the character, needs and opportunities for each area. This should include creating a strong economy, achieving strong, vibrant and healthy communities and protecting and enhancing the natural and built environment. It is important that all these factors are considered when deciding on the merits of proposed new development.

9. LOCAL PLANNING POLICY

- 9.1 The following sections of the Council's Development Plan are relevant:-

EMP3: Local Quality Employment Areas

ENV1 : Nature Conservation

ENV3: Design Quality

ENV5: Flood Risk, Sustainable Drainage System and Urban Heat Island Effect

ENV7: Renewable Energy

ENV8: Air Quality

TRAN2: Managing Transport Impacts of New Development

EMP5 Improving Access to the Labour Market Training and Recruitment

SAD EMP1: Employment Land Development Sites

SAD EMP2 – Training and Recruitment

SAD EMP4 : Relationship between Industry and Sensitive Uses

SAD EOS9: Urban Design Principles

SAD EOS10: Design Quality & Environmental Standards

- 9.2 EMP3 Local Quality Employment Areas seek to provide a portfolio of local quality employment land. This particular site has been allocated as such.
- 9.3 ENV1 Nature Conservation states that development will not be permitted for nationally designated sites such as SINCS, but with regard to Wildlife Corridors designation the policy does not preclude development but states that wildlife should not be impeded by development. The scheme provides measures that would assist with the flow of wildlife through the 8

metre buffer along the water course and the introduction of additional trees for nesting birds, albeit this has been questioned by the Wildlife Trust.

- 9.4 ENV3 Design Quality seeks to achieve high quality design which introduces measures that achieve crime prevention through secured by design principles. The main area of concern relates to the introduction of the new pedestrian/cycle link. The scheme could be conditioned to adopt these principles.
- 9.5 ENV5 Flood Risk, Sustainable Drainage System and Urban Heat Island Effect, refers to ensuring that schemes do not exacerbate flooding using sustainable drainage systems. The scheme provides such measures.
- 9.6 ENV7 Renewable Energy refers to the introduction of renewables to reduce energy consumption, this could be conditioned.
- 9.7 ENV8: Air Quality refers to reducing exposure to poor quality area. Conditions are recommended by Environmental Health following the review of the Air Quality Assessment, to include an Earthwork/construction mitigation plan; introduction of the electric vehicle charging points (stated to be 63.5% of the car parking area) and the submission of a low emissions strategy commensurate to the calculated damage limitation cost (see 7.8 above).
- 9.8 TRAN2: Managing Transport Impacts of New Development requires proposal to demonstrate their travel and transportation impacts together with proposal for mitigation. The impacts for this scheme remain uncertain with concerns regarding the effect of vehicular trips on the road network, difficulties with access and egress for HGVs and poor connectivity to the site for pedestrians and cyclists.
- 9.9 EMP5 Improving Access to the Labour Market Training and Recruitment and SAD EMP2 – Training and Recruitment requires large employment generating schemes to provide opportunities for training and recruitment. This could be conditioned to secure these opportunities.
- 9.10 SAD EMP1: Employment Land Development Sites identifies sites within the Borough for B1b (Research and Development), B1c (Light Industrial), B2 (General Industrial) and B8 uses (Storage and Distribution). This site is allocated for this purpose.
- 9.11 SAD EMP4 : Relationship between Industry and Sensitive Uses refer to considering adverse effects of industrial development on neighbouring uses stating they should not be permitted unless the adverse effect can be reduced to an acceptable level. This proposal has raised concerns regarding noise resulting from the activities associated with an

employment use for industrial purposes, however conditions have been recommended to protect residents from noise. (refer to 7.10 above). More critically, the interface distance of the building itself and its massing has raised concerns and in this regard the relationship of the building is considered to cause harm to the amenity of the residential properties on Tiford Road.

- 9.12 SAD EOS9: Urban Design Principles refers to new development being of appropriate scale and compatible with their surroundings. As indicated above the area is characterised by a variety of uses, however the scale of building in relation to the adjoining residential boundary is of concern. The current height does not meet the separation distances set out within the Revised Residential Design Guide SPD which can be used as a guide to determine whether there is an appropriate separation between new industrial building and existing residential property.
- 9.13 SAD EOS10: Design Quality & Environmental Standards refers industrial development giving regard to i) materials and landscaping, ii) pollution and noise control and iii) environmental impact including wildlife. With regard to the proposal, the materials are relatively standard and landscaping buffers are provided, as indicated above noise can be controlled by condition but whilst mitigation has been provided to preserve the wildlife corridor, this has been questioned by the Wildlife Trust.

10. MATERIAL CONSIDERATIONS

- 10.1 The material considerations relating to Government policy (NPPF) and proposals with the local plan have been referred to above in Sections 8 and 9. With regard to the other considerations these are highlighted below:

10.2 Loss of light and/or outlook and overbearing nature of the proposal

As indicated the proposal by virtue of its height and mass and separation from residential properties on Tiford Road is likely to cause harm to outlook. Despite the introduction of the trees, which are welcomed, concerns remain, as the trees are deciduous will take up to 10 years to mature and when not in leaf, the building will appear dominant and imposing to residents.

10.3 Access, highway safety, parking and servicing

As indicated above, the access arrangements have raised concerns regarding queuing traffic onto the road network and the projected figures for parking have been questioned.

10.4 Traffic generation

The Highways department and Highways England consider that the assessment should further evidence was required regarding traffic implications on around Birchley island Junction 2 of the M5. Sandwell's highways have re-iterated their concerns following receipt of additional information (para 7.3) but comments are still awaited from Highways England (para 7.4).

10.5 Noise and disturbance from the scheme

Whilst I remained concerned regarding the control of noise through conditions referred to above (para 7.10). I am advised that these will suitably control noise and I am aware of such conditions being imposed on other industrial related development.

10.6 Air quality/pollution

The Air Quality Assessment has been considered by the Environmental Health Officer the mitigation measures proposed are deemed to be acceptable.

10.7 Nature conservation and loss of ecological habitats

Whilst the development will reduce the area for ecological habitats, the water course will be protected and will allow habitats to move through the site along the wildlife corridor. Therefore in light of the current policy requirement and the current designation the mitigation measures are deemed to be acceptable.

10.8 Flood risk

The proposal has been assessed against the Flood Risk Assessment and Drainage Strategy and no objections have been received from either the Environment Agency or the Lead Local Flood Authority (LLFA). As indicated above appropriate mitigation has been proposed and is deemed to be acceptable to reduce flooding.

10.9 Security and Safety

The proposed footpath link has given rise to additional concerns regarding security and safety, I am mindful that secured by design measures could control the access, but given the proximity of the footpath to the residential property 131 Titford Road, even with these measures in place, I remain concerned that their security could be compromised.

11. IMPLICATIONS FOR SANDWELL'S VISION

- 11.1 The proposal supports Ambitions 3, 8 and 10 of the Sandwell Vision 2030:-
- 11.2 Ambition 3 – Our workforce and young people are skilled and talented, geared up to respond to changing business needs and to win rewarding jobs in a growing economy
- 11.3 Ambition 8 – Our distinctive towns and neighbourhoods are successful centres of community life, leisure and entertainment where people increasingly choose to bring up their families.
- 11.4 Ambition 10 – Sandwell has a national reputation for getting things done, where all local partners are focussed on what really matters in people's lives and communities.

12. CONCLUSIONS AND SUMMARY OF REASONS FOR THE RECOMMENDATIONS

- 12.1 The proposal in principle should be accepted given that the site is allocated for industrial development. Nevertheless in this instance, material consideration relating to loss of outlook/overbearing nature, traffic generation/parking and sustainable pedestrian/cycle routes are still deemed to be unacceptable. Therefore giving regard to these factors it is considered that the detailed proposal under consideration would:-
- i) Give rise to severe highway safety issues due to insufficient information being provided in relation to traffic generation and insufficient parking within the site and the proposed pedestrian/cycle route would not provide appropriate sustainable travel opportunities to access the site and is therefore contrary to TRAN 2 Managing Transport Impacts of New Development;
 - ii) The proposal would result in harm to residential property by virtue of loss of outlook due to the proximity, mass and height of the buildings having an overbearing effect on the nearest residential properties and being contrary to Policies EMP4, ENV3 and SAD EOS9.
 - iii) The proposal footpath link would have detrimental effect on the amenities of the adjoining property 131 Titford Road by virtue of noise and disturbance due to the proximity of the footpath to their property.

13. STRATEGIC RESOURCE IMPLICATIONS

- 13.1 When a planning application is refused the applicant has a right of appeal to the Planning Inspectorate, and they can make a claim for costs against the council.

14. LEGAL AND GOVERNANCE CONSIDERATIONS

- 14.1 This application is submitted under of the Town and Country Planning Act 1990.

15. EQUALITY IMPACT ASSESSMENT

- 15.1 There are no equalities issues arising from this proposal and therefore an equality impact assessment has not been carried out.

16. DATA PROTECTION IMPACT ASSESSMENT

- 16.1 The planning application and accompanying documentation is a public document.

17. CRIME AND DISORDER AND RISK ASSESSMENT

- 17.1 The scheme can be conditioned to be designed in accordance with Secure by Design guidance.

18. SUSTAINABILITY OF PROPOSALS

- 18.1 Refer to the national planning framework (8) and local plan policies (9) and material considerations (10).

19. HEALTH AND WELLBEING IMPLICATIONS (INCLUDING SOCIAL VALUE)

- 19.1 Refer to the summary of the report (12) in particular the scheme can be conditioned to provide opportunities for training and recruitment in accordance with SAD EMP2.

20. IMPACT ON ANY COUNCIL MANAGED PROPERTY OR LAND

- 20.1 There will be no impact.

DRAWING NUMBER
31058-PL-05

OUTLINE SPECIFICATION

Refer to schedules for plant sizes, form, support and tree pit dimensions

Treepit dimensions: Formation depth as schedules
300mm depth topsoil over 450/600mm depth free draining subsoil
Shrub/ Transplant Beds: 300 x 300mm x 300mm deep pits backfilled with topsoil within 700mm depth of subsoil.
Reinforced Grass Path: Infill grids with imported topsoil
Wildflower & Grass Areas: 400mm depth of subsoil. No topsoil.

Subsoil shall be sourced from soils below the topsoil layer with minimal organic matter and consist of a mix of clay and stone. No construction fill shall be evident in this layer.

Imported topsoil shall be in accordance with BS3882:2015. "Multi-Purpose" grade as supplied by Freeland Horticulture or otherwise approved. Tel:01222-619161

Remove objects greater than 75mm in size from the topsoil and cart away.

Provide an analysis of imported/ stockpiled topsoil with recommendations for making good any deficiencies. Provide details of the source and a 1kg sample of imported topsoil for approval by the Landscape Architect.

TREES

Tree Inspection
Trees to be selected by the Landscape Architect at the grower's nursery.

Triple staking: 3No. 75mm diam. x 1800mm long stakes set equidistant around the tree rootball. Top of stake 800mm above ground level. Tree tied to each stake with 25mm wide neoprene straps and 300mm long plastic sleeves.

Oblique staking: Single 75mm diam. x 1800mm long stake set at 45 degrees in North East direction and fixed to stem with single spacer and 38mm wide neoprene strap

Single Staking
Single 75mm diam. x 1800mm long stake fixed twice with neoprene straps and rubber spacers

Root Preparation
Trees to be rootballed for planting between November and March inclusive.
All trees to be container grown or containerised for planting between April to October inclusive.

Install 75mm diameter land drain to completely surround the rootball of each tree with one end exposed above the mulch.

SHRUB SELECTION
Do not deliver onto site any substitution of species, cultivar, plant size or container volume other than described in the Plant Schedules without prior approval from the Landscape Architect. The Contractor shall submit a list of possible alternatives beforehand for agreement by the Landscape Architect.

SHRUB PLANTING
Refer to schedules for container grown or bareroot shrubs. Bareroots to be planted between November and March inclusive. For all shrubs and transplants, backfill 300 x 300 x 300mm deep plant pit with 1 part Green-Waste compost and 5 parts topsoil thoroughly mixed before backfilling.

BAREROOT / TRANSPLANT PLANTING
Bareroot plants only to be planted between November and March inclusive. Substitute for container grown stock if planted outside the planting season.

Shrubs planted into graded and cultivated subsoil within 30 x 30 x 30cm deep plant pits backfilled with imported/ stockpiled topsoil mixed with an approved Green-Waste compost at a rate of 3kg per cu.m. Conditioner must be mixed with topsoil prior to backfilling plant pits.

All bareroot trees and shrubs to be dipped in mycorrhizal fungi slurry as Terraviv-G supplied by PlantWorks Ltd. (www.plantworks.co.uk) diluted to 1:5 mix. Dip whole root system prior to planting. Allow for suitable containers to be located close to the planting areas.

MULCH
50mm thick x 300mm² surround of 35-75mm size bark mulch cover to all exposed topsoil within plant beds. 14% maximum wood content permitted. Provide a sample to the Landscape Architect prior to delivery.

WILDFLOWER & GRASS AREAS
No topsoil to be spread in grass areas, except the reinforced grass path. Cultivate the subsoil to provide a fine tith. Remove stones and other objects greater than 75mm in size.

Wildflower & Grass Mix: "EM2" Meadow Grass Mixture sown at a rate of 5 grams per sq.m. as supplied by Emorsgate Seeds (01553-829028 / www.wildseeds.co.uk)

A general pre-seeding fertiliser shall be applied to the soil between 3 and 5 days before laying turf or sowing seed and incorporated into the top 25mm of tith at a rate of 70gms/sq.m

Reinforced Grass specification:
Seed Grass: Grade "A19", as supplied by Germinal, sown at a rate of 35 grams per sq.m. (01522-868714/ www.germinal.com)

RABBIT PROTECTION
Provide plastic spiral rabbit guards to all trees.

WATERPOINTS
3No. Waterpoint to be installed to meet the local Water Authority requirements: 25mm coupling set 300mm above ground level within lockable galvanised metal box on concrete foundation, separated from water supply with break valves.

MAINTENANCE
Defects Period for 52 weeks following Practical Completion. Allow for 17 maintenance visits for watering, cutting, weeding, pruning and litter collection.

PROTECTION OF EXISTING TREES
Provide temporary protective fencing to be erected following tree works and prior to demolition and construction works. To be removed on completion of paving construction. No materials to be stored within the fenced area. 1.8m high weldmesh panels fixed by clamps to 2.4m long scaffold tubes rammed into the ground between each panel

Philip Shakespeare started this petition to Sandwell MBC Planning Department and 1 other

FLATTENING OF THE OLDBURY 'GREEN' CORRIDOR (Ref. DC/19/63297)

As a resident who is situated within walking distance of the M5, Junction 2 and various different factories / industrial estates, we are already subjected to high levels of air pollution. I could reference hundreds of research papers that conclude that greenery significantly improves air quality in built up areas. Therefore, in a time where we are more environmentally conscious than ever, I am appalled at the planning application to Sandwell MBC to allow Canmoor (Oldbury) Ltd (which is actually in London) working on behalf of ASDA (Oldbury) to destroy this green corridor and build an industrial unit the size of a football pitch in its place. I argue that your rationale demonstrates an utter disregard for, not only the residents, but also the wildlife that inhabit this space and have done for hundreds of years.

This demonstrates a clear lack of respect you have for the residents, the impact on already over congested roads and more importantly the hundreds of species of wildlife effected by this decimation.

"WITHOUT A HABITAT THERE IS NO WILDLIFE"

The UK's biggest free weekly newspaper delivered to 210,000 homes

chronicleweek

Fight to save woodland

Nearly 20,000 people have backed a petition calling on Sandwell Council to throw out plans for a "football pitch-sized" industrial unit on vital green space.

The petition was started just over a week ago but has since amassed almost 19,000 signatures.

Campaigners are protesting against plans to flatten the Oldbury wildlife corridor - which developers want to build new warehouses on. Plans have been lodged with Sandwell Council to build the two units, which would be used for storage and distribution, on the privately-owned land next to the Asda supermarket. But residents have raised fears the proposed development would destroy vital wildlife habitats.

Phil Shakespeare, who launched the petition, said: "We are really pleased with the response to the petition - we had been hoping for 1,000 to 2,000 signatures tops, but it seems to have gone viral. The petition is a little focus in a little area on a much wider issue. One day we will wake up and our children will have no green spaces left.

"It is protecting the green spaces we have left. It is heartbreaking to think it could be turned into concrete. We have got until the end of this week to hand the petition into the council. Then the proposals should be up at planning committee in October.

"We need to keep up the pressure. We

Part of the woodland in Oldbury, which is situated behind the Asda store

will continue to fight this." Local resident Val Stephenson said there were plenty of other sites more suitable for the industrial units.

She said: "There are more than enough empty warehouses in Oldbury. If one is needed, why not use the old Toys R Us site. Save the wildlife and green spaces." Tracey

Pye added: "This is totally depressing. It's a tiny sanctuary for wildlife in this over-developed part of Sandwell."

The woodland is located off Wolverhampton Road between the Asda superstore and Langley Primary School. A decision on the plans is expected in the coming months.

Campaigners call for boycott of Asda in Oldbury over industrial unit plans

Residents of Titford Road are calling on people to boycott Asda in Oldbury in protest at plans to build two industrial units of 7,503 square on land adjacent to the supermarket

Oldbury wildlife corridor

Campaigners fighting a controversial plan to build on what they claim is a wildlife corridor have said they are going to take their fight to the supermarket giant which owns the land.

Residents of Titford Road are calling on people to boycott Asda in Oldbury in protest at plans by London-based Canmoor Ltd to build two industrial units of 7,503 square on land adjacent to the supermarket and owned by the retail company.

B READ MORE

↳ Shock after residents wake to find bulldozers on land near their homes

The move comes after an estimated 200 people attended a public meeting opposed to the scheme and 20,000 more signed an online petition objecting to the proposal.

Phil Shakespeare, a local campaigner, says opponents of the scheme now plan to launch a social media campaign aimed at shoppers with the hashtag #boycottasda.

Claiming the development would destroy a valuable wildlife habitat which is home to badgers, foxes and bats, he said: "Residents on Titford Road have said they won't shop at Asda and we are now looking to use the three most popular Facebook websites in the area to urge people not to use the store."

Asda has confirmed it owns the land but says it is not linked to the plans which would cover an area the size of two football pitches and include warehousing, car parking, a service yard and loading docks.

In a statement accompanying the planning application, Canmoor Ltd said: "The proposed development will make efficient and effective use of the site and create additional employment floorspace, attracting investment to and creating jobs in the borough."

Sandwell Council's planning committee is expected to make a decision on the plans in October.

Fury as developer advertises for tenants BEFORE getting planning permission

By News Group reporter

Fury as developer advertises for tenants BEFORE getting planning permission Plans for industrial development on land to the rear of Titford Road Oldbury.

Pic: Sandwell council planning department.

CAMPAIGNERS fighting a proposed distribution centre on green space in Oldbury are furious that developers are advertising for tenants before it has been given planning permission.

Objectors have said they are in a David and Goliath fight to protect the land, which is home to badgers, foxes and bird species such as common buzzards and which helps mitigate air pollution from the nearby M5.

The advertising has further incensed residents of Titford Road who only learned of the proposal three weeks ago when bulldozers moved on to the land to begin ground testing.

London based Canmoor Ltd has submitted plans to Sandwell Council for two industrial units of 7,503 square metres with car parking, a service yard and loading docks.

Since the proposal was published last week, over 1,100 people have signed an on-line petition opposing the development which protestors say would destroy a wildlife corridor.

1 comment

To view the petition, search for 'Oldbury Wildlife Corridor' on www.change.org.

Lead campaigner, Phil Shakespeare, says the developers are now advertising the site as suitable for industrial and distribution companies before it has gone to Sandwell Council for formal approval.

He said: "I'm outraged - bearing in mind that the residents were even notified before work took place - to find this green corridor is being advertised for let as if it's a done deal and the wildlife area has already been flattened.

"We are trying to prevent this area being turned into concrete and to highlight to people that green zones are getting less and less and disappearing.

"I always thought that green spaces were protected. It is surprising to me that businesses as far away as London can sell them even before we can acknowledge the fact that they are threatened."

He said Sandwell Council had been inundated with objections to the scheme, adding: "I think this is a case of David and Goliath and I'm worried that big business will stamp all over local residents."

Canmoor Ltd has been contacted for comment.

In a statement accompanying the planning application, Canmoor Ltd said: "The proposed development will make efficient and effective use of the site and create additional employment floorspace, attracting investment to and creating jobs in the borough."

HUNDREDS SIGN UP TO SAVE OPEN LAND

Report by Dayna Farrington

MORE than 1,000 people have signed a petition against proposals to build two industrial units on land behind an Oldbury supermarket.

Plans have been lodged with Sandwell Council to build the units, which would be used for storage and distribution, on the privately-owned land next to Aude. But residents have raised fears the proposed development would destroy wildlife habitats - and a petition launched just over a week ago has so far attracted 1,179 signatories. Phil Bhattacharya, who launched the petition, said the development would be built at the back of people's homes.

Petition for Mylee's Law

The mother of tragic eight-year-old Mylee Billingham - who was stabbed to death by her father - is calling for the government to create 'Mylee's Law' as the law to keep her ex-partner away from her two other children.

Tracy Townsend, from Walsall, has launched a petition which calls for a law to automatically remove the parental responsibility of someone if they are convicted of serious crime. She said online: "I have three children. My eight-year-old daughter was murdered by my ex-partner. He is serving a life sentence, but he still has legal rights to my other two children, making life extremely difficult."

"Parents should not have to go to court to remove parental responsibility when a partner has committed a serious crime. The law needs to be changed so parental responsibility is automatically removed after conviction."

William Billingham, aged 65, was handed a life sentence of at least 21 years back in October for the "brutal and cowardly" murder of his young daughter. The murderer, who will be 62 before he can be considered for release, killed his daughter in his Browns Hills bungalow in a revenge act against Ms Townsend.

Mr Bhattacharya said: "Mylee and fellow residents from Tetford Road will be directly affected by these proposals. As a collective group, we decided to start the petition against the plans."

"We have been overwhelmed with the response from people."

"We have got an ecology report which has highlighted that there is protected bats, foxes, badgers, hares and buzzards living in the wildlife corridor."

"It will also be the destruction of all the forest area which filters fumes from the M5 which will be turned into concrete."

"Our petition will be handed into the council before it makes its formal decision later this year."

"We just want to highlight to people what is going on."

A design and access statement, submitted with the application, states: "The proposal is for two industrial units with the associated revised access, parking and landscaping."

A spokesman from Sandwell Council previously said: "A planning application has been submitted for two industrial storage/distribution units."

"Residents will be receiving consultation letters giving them the opportunity to put any comments or objections in writing."

"The land is not green belt but is allocated for employment."

The day I entered Londonderry

George Green was among the first soldiers sent to Northern Ireland in a move that sparked decades of conflict

It is 60 years since British troops were sent on to the streets of Northern Ireland - and George Green was among the first to walk the streets. The pensioner, 75, was in the first group of Brit-

ish Army soldiers tasked with breaking up a riot and restoring peace. He was initially stationed in the midst of the violence in

Londonderry where clashes involving nationalists, unionists and the police had been going on for three days. He said: "We were in at the deep end. You didn't know who was friend or foe."

NEWS BRIEFING

Crews rescue man from canal

A man has been rescued from a canal in Oldbury. Firefighters and paramedics were called to the Tetford Canal at Tet Bank Road in around 10.15pm on Monday night.

Fire crews from Oldbury, Woodgate Valley and Wednesbury helped rescue the man from the water.

He was then treated by paramedics and taken to Sandwell Hospital for further assessment.

A spokesman for West Midlands Ambulance Service said: "We were called to reports of a patient in the water, near to Tet Bank Road, at 10.15pm."

"One ambulance, a senior paramedic, a paramedic officer and our Hazardous Area Response Team attended the scene."

"On arrival we discovered one patient, a man, who was still in the water."

"Ambulance staff worked with the fire service to rescue the man."

"He was treated for injuries not believed to be serious before being taken to Sandwell Hospital."

POLICE

Shop and home in link to kidnap probe

A shop and home in Staffordshire were named off by police investigating the disappearance of a Vietnamese tourist.

A house on St James Road and 11 Dale UK mall bar on Mill Street, both Cannock, were cordoned off yesterday after 16-year-old tourist Linh Thi Dieu Lu disappeared in York. She has now been found safe.

A man and a woman were arrested in Staffordshire in connection with the alleged abduction. Another man Ho Quang Hien, aged 25, has been charged with child abduction and facilitating a breach of immigration laws. He appeared at York Magistrates' Court on Monday and entered a not guilty plea. He will appear at York Crown Court on September 16 for trial.

SUPPORT

Julie backs hospice

Dame Julie Walters is urging people to support a £5 million fundraising campaign to save Aneurin children's hospice in Walsall from closure. The Black Country-born actress is the latest celebrity to throw her support behind the appeal.

Petition launched as bulldozers arrive on wildlife corridor

Residents up in arms

over warehouse plan

Report by Georgina Cutler
newswatch@mmamedia.co.uk

A PLANNING application for two industrial units on a green corridor in Oldbury has sparked anger from residents.

Plans have been lodged with Sandwell Council to build the units, which would be used for storage and distribution, on privately owned land behind Asda.

There are fears the proposed development would destroy vital wildlife habits.

Residents reported that bulldozers arrived on site last week after the plans were submitted by London based firm Carmoor Ltd earlier this month.

However Sandwell Council has not yet made a decision on the planning application, which will be discussed at an upcoming meeting.

Resident Phil Shakespeare plans to launch a petition and wants to get Warley MP John Spellar and Langley ward councilors involved.

Mr Shakespeare, aged 50, told the Express & Star: "They have already started bulldozing the site. I predict that thousands will sign the petition. They (the developers) want to squash the lot (trees) and build two huge industrial units in its place."

"The industrial units will be built at the end of people's homes. But the trees help cut the fumes from the M5 and provide a home for wildlife."

The woodland is located off Wolverhampton Road between the Asda superstore and Langley Primary School and is near to the M5, which runs on a bridge close by.

According to a document, the planning application is for two "modern employment sites" which will cover an area of 7,603 sq m - larger than a professional football pitch. The proposed development would include offices and a car park. The public can object to the application by August 14.

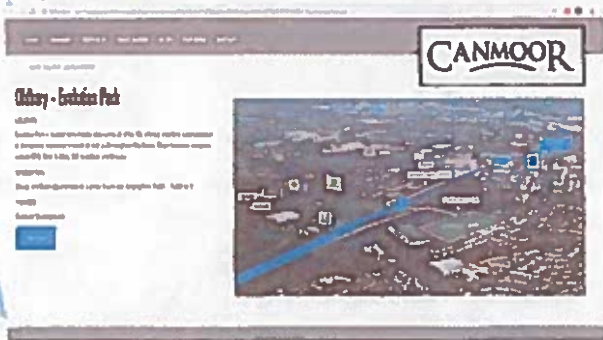

A council spokesperson said: "A planning application has been submitted for two industrial storage and distribution units. Residents will be receiving consultation letters."

"Clearing the site does not constitute the start of development and the council has no authority to stop this under planning law. The land is not green belt but is allocated for employment."

"An ecology report has been submitted as part of the application."

The site where the storage and distribution units could be built if controversial plans are agreed. Picture: Google

Nearly 20,000 sign petition against plans for industrial units in Oldbury

By Dayna Farrington | Oldbury Property | Published: 15 hours ago

28th August 2019

Nearly 20,000 people have backed an online petition calling on Sandwell Council to throw out plans for a "football pitch-sized" industrial unit on vital green space.

An aerial view showing the woodland where the development is proposed. Photo: Google Maps

The petition was launched just two weeks ago but has since amassed thousands of signatures and is currently standing at around 18,990.

Campaigners are protesting against plans to flatten the Oldbury wildlife corridor - which developers want to build new warehouses on.

The plans have been lodged with Sandwell Council to build the units, which would be used for storage and distribution, on the privately-owned land next to the Asda supermarket.

The woodland is located off Wolverhampton Road between the Asda superstore and Langley Primary School and is near to the M5, which runs on a bridge close by.

Phil Shakespeare, who launched the petition, said: "We are really pleased with the response to the petition - we had been hoping for 1,000 to 2,000 signatures tops, but it seems to have gone viral."

"The petition is a little focus in a little area on a much wider issue. One day we will wake up and our children will have no green spaces left."

"It is protecting the green spaces we have left. It is heartbreaking to think it could be turned into concrete."

"We have got until the end of this week to hand the petition into the council. Then the proposals should be up at planning committee in October."

"We need to keep up the pressure. We will continue to fight this."

A design and access statement, submitted with the application, states: "The proposal is for two industrial units with the associated revised access, parking and landscaping."

"The service yards are located to the north west of the units and include three loading docks and two level access doors adjacent to sides of the loading docks respectively. The service areas includes the HGV parking spaces and allows enough space for vehicle manoeuvring."

"The car parking, including the accessible parking bays and the cycle and motorcycle parking is provided near the office components. There are 63 parking spaces provided in total for the development."

Sandwell Council's planning committee is expected to make a decision on the plans in the coming months.

Fury as developer advertises for tenants BEFORE getting planning permission

By News Group reporter

Fury as developer advertises for tenants BEFORE getting planning permission

Plans for industrial development on land to the rear of Titford Road Oldbury. Pic: Sandwell council planning department.

f t in 1 comment

CAMPAIGNERS fighting a proposed distribution centre on green space in Oldbury are furious that developers are advertising for tenants before it has been given planning permission.

Objectors have said they are in a David and Goliath fight to protect the land, which is home to badgers, foxes and bird species such as common buzzards and which helps mitigate air pollution from the nearby M5.

The advertising has further incensed residents of Titford Road who only learned of the proposal three weeks ago when bulldozers moved on to the land to begin ground testing.

London based Canmoor Ltd has submitted plans to Sandwell Council for two industrial units of 7,503 square metres with car parking, a service yard and loading docks.

Since the proposal was published last week, over 1,100 people have signed an on-line petition opposing the development which protestors say would destroy a wildlife corridor.

To view the petition, search for 'Oldbury Wildlife Corridor' on www.change.org.

Lead campaigner, Phil Shakespeare, says the developers are now advertising the site as suitable for industrial and distribution companies before it has gone to Sandwell Council for formal approval.

He said: "I'm outraged – bearing in mind that the residents were even notified before work took place – to find this green corridor is being advertised for let as if it's a done deal and the wildlife area has already been flattened.

"We are trying to prevent this area being turned into concrete and to highlight to people that green zones are getting less and less and disappearing.

"I always thought that green spaces were protected. It is surprising to me that businesses as far away as London can sell them even before we can acknowledge the fact that they are threatened."

He said Sandwell Council had been inundated with objections to the scheme, adding: "I think this is a case of David and Goliath and I'm worried that big business will stamp all over local residents."

Canmoor Ltd has been contacted for comment.

Huge response to protest against plans to 'destroy' Oldbury wildlife haven

Bats, badgers and birds have all made themselves at home in woodland behind Asda in Wolverhampton Road, Oldbury

A wildlife haven could be 'destroyed' to make way for two huge industrial units - and people are not happy.

Bats, badgers and birds have all made themselves at home in woodland behind Asda in Wolverhampton Road, Oldbury.

But London-based firm Canmoor Ltd has applied to Sandwell Council to build the storage and distribution units in the middle of the privately-owned land, just off the M5.

The application acknowledges the site is part of a 'wildlife corridor' - so developers have vowed to create landscaped areas and keep as many of the existing trees as possible, especially those with potential for bat roosting.

"The trees take most of the fumes away and reduce the traffic noise and noise from the Asda supermarket.

"It is home to a lot of wildlife, including a pair of mated buzzards, bats, herons and badgers."

Mr Shakespeare told [Black Country Live](#): "I think it's absolutely disgusting, they shouldn't be allowed to do this.

"I have contacted Bill Oddie and Chris Packham because they might add weight to my argument."

A spokesman for [Sandwell Council](#) told Black Country Live: "Clearing the site does not constitute the start of development and the council has no authority to stop this under planning law.

Oldbury wildlife corridor

Additionally, 163 new trees will be planted to fully surround the development and a 'buffer zone' will be created - with a range of trees and shrubs - to act as screening for nearby residential properties.

However residents remain outraged - especially as work to clear the site has already begun - and Phil Shakespeare has launched a petition in a desperate bid to stop the plans.

The petition, which has already gained more than 4,000 signatures, reads: "We do not want the land to be destroyed and built on as the removal of the trees and greenery will remove the filter that we have from the motorway and other traffic pollution in the area.

At least five foxes were photographed on the site (image: Phil Shakespeare)

"The land is not green belt but is allocated for employment. An ecology report has been submitted as part of the planning application, which will be considered by the planning committee due to the volume of objections received."

Residents who would like to find out more about the proposed development have been invited to a meeting at 8pm tonight (Thursday, August 22), at the Crosswells Inn, in Whyley Walk, Oldbury, to discuss the plans.

Alison Bishop from Sandwell Council's planning department and Councillor Bill Gavan are expected to attend.

WE WILL FIGHT TO SAVE LAND

Report by Megan Archer

NEARLY 20,000 people have backed a petition calling on Sandwell Council to throw out plans for a "football pitch-sized" industrial unit on vital green space.

The petition was started just over a week ago but has since amassed almost 19,000 signatures. Campaigners are protesting against plans to flatten the Oldbury wildlife corridor - which developers want to build new warehouses on. Plans have been lodged with Sandwell Council to build the two units, which would be used for storage and distribution, on the privately-owned land next to the Asda supermarket. But residents have raised fears the proposed development would destroy vital wildlife habitats.

Phil Shakespeare, who launched the petition, said: "We are really pleased with the response to the petition - we

been hoping for 1,000 to 2,000 signatures tops, but it seems to have gone viral. One day we will wake up and our children will have no green spaces left.

"It is protecting the green spaces we have left. It is heartbreaking to think it could be turned into concrete. We have got until the end of this week to hand the petition into the council.

"We need to keep up the pressure. We will continue to fight this."

Local resident Val Stephenson said there were plenty of other sites more suitable for the industrial units.

She said: "There are more than enough empty warehouses in Oldbury. If one is needed, why not use the old Toys R Us site. Save the wildlife and green spaces."

The woodland is located off Wolverhampton Road between the Asda superstore and Langley Primary School. A decision on the plans is expected in the coming months.

Stop the flattening of the Oldbury Wildlife Corridor to build Industrial Units

Philip Shakespeare started this petition to Sandwell MBC Planning Department and 1 other

FLATTENING OF THE OLDBURY 'GREEN' CORRIDOR (Ref. DC/19/63297)

As a resident who is situated within walking distance of the M5, Junction 2 and various different factories / industrial estates, we are already subjected to high levels of air pollution. I could reference hundreds of research papers that conclude that greenery significantly improves air quality in built up areas. Therefore, in a time where we are more environmentally conscious than ever, I am appalled at the planning application to Sandwell MBC to allow Canmoor (Oldbury) Ltd (which is actually in London) working on behalf of ASDA (Oldbury) to destroy this green corridor and build an industrial unit the size of a football pitch in its place. I argue that your rationale demonstrates an utter disregard for, not only the residents, but also the wildlife that inhabit this space and have done for hundreds of years.

This demonstrates a clear lack of respect you have for the residents, the impact on already over congested roads and more importantly the hundreds of species of wildlife effected by this decimation.

REASON FOR SIGNING

I am signing this petition because we need more green spaces not less. Trees not concrete are our lungs. As the pollution from cars and lorries increases these pockets of green spaces are vital for our wellbeing.

REASON FOR SIGNING

There's a lot of industrial land derelict around Oldbury. So much that some of it is even being redeveloped for housing. Bulldozing invaluable greenery for warehousing defies all understanding. Especially as it will result in displaced wildlife (biodiversity anyone ?) and a towering and oppressive building reminiscent of the Berlin Wall just feet from the rear of residential properties and a primary school.

REASON FOR SIGNING

We have 'designer' new-build warehouses standing empty all over this country now - yet another government scam I assume that's lined the pockets of the wealthy. Much like the 'help to buy' schemes and all the other rubbish that is destroy-

ing our beautiful and oh so precious countryside. We the tax payer are paying to help commuters live in brand new executive homes in towns that are now choked to death by over development. Help to buy was meant to help the ordinary working man own his/her own affordable home - not allow already well paid individuals buy a 5 bedroom luxury house! I assume there is something similar going on with these warehouses.

Meanwhile our once thriving more industrial town centres and established industrial estates are dying while more and more green space (once protected!) land disappears under concrete! It's crackers and corrupt beyond belief.

I wish you much luck with your petition Phil, get it on facebook and the news when you can. My area has been sneakily decimated by greedy developers, I hope you can protect yours! All the best.

They are cheap to build and earn developer a large profit. Cheaper to build on green land than it is to clean up existing site. Council get fed the "we're creating jobs" spiel. They'll concrete over all the natural habitat and plant around 10 shrubs and put up a few bat boxes to say they've reduced their environmental impact. Local residents will also be able to see the 15m high building from their houses and have lorries running up and down the streets at all hours of the day.

Great

REASON FOR SIGNING

I live with constant pollution from M5 and Wolverhampton Rd. Green spaces are getting fewer and fewer, smaller and smaller. Not only are these lovely places to walk, and habitats for wildlife, but are oxygen producers which are necessary for life! In the 12 months since I have been in this area Lion Farm playing fields are to become a shopping area which is very unlikely to thrive, an area behind Tifford Pools is sold off for development, and now this area! Whilst the eyesore of an empty Toys R Us store still remains. Sandwell should be ashamed if this goes ahead

WITHOUT HABITAT THERE IS NO WILDLIFE

It is so sad the wildlife will lose their home, it is a little bit of green belt and wildlife HAVEN in a built up area. When there is so much brown free factory warehouse sites laying empty and disused right near the site they want to flatten. As well as it's a flood plane our houses will flood and small things we take for granted will be a memory, our security and privacy let alone the sounds of nature, will be a thing of the past. Where will all the animals go if their home is destroyed. Money and greed are making our wildlife extinct. Our future children will know nothing of nature soon, there will be none. The trees also stop the pollution and the noise from the motorway, everyone is on about being Eco friendly and here it is being destroyed for money.

Save our WILDLIFE CORRIDOR, SAVE THE ANIMALS AND BIRDS WHO DON'T HAVE A VOICE !!

We will fight this !!

REASON FOR SIGNING

The rapid destruction of green belt and wildlife habitat for industrial and housing is totally unnecessary when there are plenty of potential brown-field site available. This is an area of natural beauty, home of a variety of wildlife, flora and fauna which will be decimated should this building work proceed. Due to its proximity to M5 the trees are providing a corridor for absorbing pollution!

0

REASON FOR SIGNING

You are destroying the borough of sandwell bit by bit. Removing green spaces and habitats for wildlife and fauna. There are so many empty shops, factory units and warehouses already. This area already suffers with horrendous congestion and air pollution. I totally support this petition

0

REASON FOR SIGNING

There's plenty of empty warehouses in the area. The wildlife needs to be protected due to massive decline in populations due to these sort of things.

Vegetation also needs to be preserved to encourage clean air.

A resident of Tifford Road; When we bought the house we were told that buidlings were not allowed to be built in the area.

Not only will it heavily impact the built up traffic in the area being next to M5 J2, It will increase the already high levels of emissions causing a detriment to our health. I also find it disgraceful that clearing of the grounds has started with minimal information being given to residents and more worryingly this includes the illegal practise of badger sett removing whom which are protected in order to make way for the development.

I have logged a complaint with the wildlife protection officer and awaiting a call back with regards to this.

bbcwildlife.org.uk

09/08/2019

Dear Mrs Bishop,

Application Reference: AB/DC/19/63297

Site Address: Land adjacent to Asda, Wolverhampton, Oldbury

Proposal: Proposed development to provide 2 No. units comprising of Industrial process (Class B1c), General Industrial (Class B2), Storage or Distribution (Class B8) with ancillary offices, car parking, landscaping, service yard areas, and associated external works.

Thank you for giving the Wildlife Trust for Birmingham and the Black Country the opportunity to respond to this full planning application.

Upon review of the documentation submitted along with the planning application specifically the Ecology Report produced by Applied Ecology Ltd and Planting Layout produced by Terry Anderson Landscape Architects in June 2018 and July 2019, respectively. We would like to bring the following significant issues and concerns to your attention;

Designated Sites

The site area encompasses the **Tame Valley Potential Sites of Importance (PSI)** and **River Tame Oldbury Branch** defined as a **wildlife corridor**, under the **'Birmingham and the Black Country Nature Conservation Strategy'**.

As a result, the proposed development will **highly likely cause a direct loss to a large area of the Tame Valley PSI**, which is noted to include semi natural mosaic habitat adjacent to a key ecological corridor, and potentially cause degradation through disturbance to the surrounding habitats (to include the River Tame and Adjacent areas of the Tame Valley (PSI) during and post construction.

PSIs are areas that have been identified as potentially having ecological value, however, have not yet been assessed against the Birmingham and Black Country Local Wildlife Sites selection criteria. Therefore, it is the opinion of the Wildlife Trust that the PSI should be assessed against the criteria to determine whether they meet the criteria of a SLINC or SINC, as part of the application, to ensure that the correct level of protection and mitigation is afforded to the site.

Protected Species

Badgers

The Wildlife Trust for Birmingham and the Black Country would seek for a pre-construction badger check, in conjunction with a watching brief, to be undertaken no more than six weeks prior to the commencement of works to confirm that the badger sett present on site still remains disused. Should the badger sett appear to be partially used or active the sett would need to be monitored, with no evidence of use, for a period of 21 days to classify a sett as disused and treated as such. Due to this being the maximum length of time a badger will remain under ground without coming to the surface. Should the sett be found to be active then licence should be obtained through Natural England to close the sett, if it cannot be retained as part of the development.

Bats, breeding birds and water voles

From the Ecology report it is understood that two surveys were undertaken for both bats and breeding birds in June 2018 and June 2019. In addition, one late season water vole survey was undertaken in July 2018.

The Wildlife Trust would seek to understand why a full survey effort, in line with best practice guidelines, was not undertaken on site to fully assess the site for these species. As described below:

As per Bat Conservation Trust good practice guidelines (3rd edition) for a habitat of low suitability there should be a transect survey visit (duration 2 hours after sunset) per season (spring – April/ May, Summer – June/July/August, Autumn – September/ October) undertaken in conjunction with automated bat surveys (one location pre transect, in total 3 surveys, to be collected on five consecutive nights).

However, one could argue that the site fits the description of a site with moderate suitability for foraging bats "Continuous habitat connected to the wider landscape that could be used by bats for commuting such as lines of trees and scrub or linked back gardens. Habitat that is connected to the wider landscape that could be used by bats for foraging such as trees, scrub, grassland or water" which would require further survey effort than stated above.

As per Common bird census methodology three breeding bird survey should be undertaken on a site. These surveys should be undertaken in April, May and June to ensure coverage of the peak period of bird activity.

As per Water vole conservation handbook 3rd edition two water vole surveys should be undertaken one early and one late season to confirm presence / likely absence of water vole along a stretch of river.

The Wildlife Trust for Birmingham and Black Country would highly recommend that best practice guidelines were followed in regards to assess the species present and their distribution on site throughout the year to ensure full survey coverage. As such would seek for further survey work to be undertaken prior to the determination of the planning application to ascertain the full impact of the proposed development on protected / priority species.

Ecological Assessment

The Ecology report submitted with the application does provide an evaluation of the protected species potentially on site and habitats. However, no requirement or confirmation on details of the mitigation within the proposed development, has been provided.

It was noted that consideration has been given to installing bat or bird boxes within the development. However, for full planning application the Wildlife Trust would seek confirmation and a commitment for the developers to provide this mitigation within the development to ensure no net loss in biodiversity as result of the application in accordance with para 174b of the NPPF that states "To protect and enhance biodiversity and geodiversity, plans should promote the conservation, restoration and enhancement of priority habitats, ecological networks and the protection and recovery of priority species and identify and pursue opportunities for securing measurable net gains for biodiversity."

In addition, it is noted that the planting layout does show the provision of wildflower meadows in small areas and tree planting along the boundary of the application site,

however, no management details of these areas has been provided in terms to maximize their value for wildlife benefit.

The site itself holds greater ecological value due to its location within the ecological network and as stepping stone along the river corridor. The proposed plan will result in further bottlenecking / narrowing of the wildlife corridor and river Tame. Upon review of the planting plan and ecology report the Wildlife Trust does not believe that current proposed mitigation considers or provides mitigation, in accordance to the mitigation hierarchy, to reduce this impact to the site and ecological network.

Therefore, at this stage the Wildlife Trust would in principle oppose this development until appropriate consideration and confirmation is given to the biodiversity within the site and the surrounding area as a key stepping stone of species within the local area.

For the Wildlife Trust to further consider the application, we would seek the production of a full Ecological Assessment. The Ecological Assessment would set out proposals for avoidance, reduction, mitigation and compensation to be incorporated within the application.

In addition, Wildlife Trust would seek for the production of:

- A Landscape and Ecological Management plan should be produced and agreed by the Wildlife Trust / Local Planning Authority ecologist, detailing management practices to be undertaken on the retained, newly created and enhanced areas of habitat within the site.
- A Construction and Ecological Management plan should be produced and agreed by the Wildlife Trust / Local Planning Authority ecologist; detailing the precautionary working methods for protected and priority species and the protection of retained habitats during site enabling works and construction.
- A drainage strategy should be devised to include an appropriate pollution prevention strategy to ensure the risk of pollution to the River Tame from run-off during and post construction is prevented.

Lighting Strategy

Upon review of the documentation provided within the planning application no details could be found on the lighting location and design. The bat surveys undertaken have shown that site holds records of different bat species, therefore, the proposed development site is likely to be used by the local bat populace for foraging and commuting. As such the Wildlife Trust would seek for the production of a lighting strategy prior to the determination of the planning application to ensure the planning application did not impact local bat species foraging and commuting routes.

The lighting strategy should detail the design and location of lighting to be used within the proposed development and also describe the methodology to minimise light spill along the retained woodland boundary.

Should you require further clarification or detail regarding the issues raised above please do not hesitate to contact me.

Yours faithfully,

Samantha Pritchard

Untitled

Hi Mandy,

Thanks for your query.

I can't see a planning application listed for this site using the map search tool on the Sandwell MBC website
<https://webcaps.sandwell.gov.uk/publicaccess/spatialDisplay.do?action=display&se archType=Application>

Have you contacted Sandwell Council about this? If not a good contact would be Zoe Wilson who is a planning officer there - her email address is:
zoe_wilson@sandwell.gov.uk

I've checked on our system and the site is not currently designated as a Local Wildlife Site (SINC or SLINC).

The site is identified as a Wildlife Corridor (see attached map) under Sandwell UDP Policy NCS which states:

The integrity of wildlife corridors and linear features will be protected. Proposals which sever these, or reduce their value to wildlife will not be permitted, unless they demonstrate adequate mitigation measures.

The site has also been identified as a Potential Site of Importance (PSI):

Sites that potentially contain areas of important semi-natural habitat but currently fall outside of the Local Site system. These sites potentially contribute to the overall cohesion and resilience of the wider ecological network by providing a buffer to, or direct link / 'stepping-stone' between other existing important areas. Many of these sites were identified through a combination of aerial photo interpretation, historic maps and species data. For some sites, recent survey information exists, and they may meet the Local Site criteria, but are yet to be evaluated against the Local Site Criteria and/or are yet to complete the formal adoption process.

Protected or Notable species:

We have records of the following species from within the site:

- Swift
- House Martin
- Linnet
- House Sparrow
- Dunnock

Untitled

- **Bullfinch**
- **Starling**

Note: these records are now quite historic (1986)

I've also attached a list of Protected or Notable species recorded within 1km of the site.

Hope this helps,

Kind regards,

Andy

Sandwell Council to launch public consultation on air quality

19.03.2019

COUNCIL NEWS

Sandwell Council, covering six towns in the West Midlands, will begin a public consultation on air quality this summer.

In October, the authority was directed by Defra to take further steps to address nitrogen dioxide emissions from road transport.

Sandwell was among 33 'third wave' councils to have been directed by government to assess options to improve air quality in light of continued breaches of legal NO₂ limits – following the High Court ruling on the government's air quality plan, brought to the courts by green group ClientEarth.

However, the council says two key roads – A41 Birmingham Road, West Bromwich, and A457 Birmingham Road, Oldbury – are expected to meet government targets for reducing nitrogen dioxide this year, thanks to improving traffic signals and retrospectively fitting buses with cleaner technology.

Cllr Elaine Costigan, cabinet member for public health and protection, said the council 'are serious about improving air quality,' and says that they want to make sure people in Sandwell are not adversely affected by Birmingham's Clean Air Zone, due to come into effect in January 2020, which could displace more polluting vehicles into Sandwell.

The M5 motorway runs through Sandwell and is one of the major sources of pollution in the borough

'It's really important for our residents' health. We're looking forward to hearing people's views on our plans in the consultation this summer,' she added.

'Changes in vehicle technology are helping but, like many areas nationwide, we need to see nitrogen dioxide levels come down further in some places.

'We're currently carrying out a study to confirm the worst polluted areas, so we can prioritise action in those hotspots.

'We're also looking at how we can reduce pollution from council vehicles and promoting walking, cycling and car sharing.'

Sandwell Council also says they are looking closely at Public Health England's review of interventions to improve outdoor air quality and public health, published last week, especially around working across council boundaries, electric vehicle charging points and promoting public transport and cycling.

THE IMPACT TREES HAVE IN WILDLIFE CORRIDORS

TREES CLEAN THE AIR

Trees absorb odors and pollutant gases (nitrogen oxides, ammonia, sulfur dioxide and ozone) and filter particulates out of the air by trapping them on their leaves and bark.

TREES BLOCK THINGS

Trees can mask concrete walls or motorways and unsightly views. They muffle sound from nearby streets and motorways, and create an eye-soothing canopy of green. Trees absorb dust and wind and reduce glare..

TREES COMBAT CLIMATE CHANGE

Excess carbon dioxide (CO₂) is building up in our atmosphere, contributing to climate change. Trees absorb CO₂, removing and storing the carbon while releasing oxygen back into the air. In one year, an acre of mature trees absorbs the same amount of CO₂ produced when you drive your car 26,000 miles

Policy MIN 1 Environmental Protection

To assess the need for the mineral resource against the need to protect and conserve the environment.

Mineral exploration and working may damage or destroy nature conservation sites and structures and remains of historic and archaeological interest that are of importance. The early identification of the presence and importance of such sites, structures and remains liable to be affected by proposed mineral developments is important. The minerals industry should seek to ensure the physical preservation of important nature conservation sites, historic buildings and ancient monuments along with their settings.

Mineral developments within or in close proximity to areas such as Areas of Special Scientific Interest or National Nature Reserves which have been declared or proposed for declaration on the basis of their scientific value in regard to flora and fauna, etc, will not normally be given permission where they would prejudice the essential character of such areas. The same will apply to areas which have been or are to be designated, scheduled or listed because they contain features of archaeological or historic interest.

The Department will balance the case for a particular mineral working proposal against the need to protect and conserve the environment, taking account of all relevant environmental, economic and other considerations. In all areas, decisions on mineral applications will be made with regard to the preservation of good quality agricultural land, tree and vegetation cover, wildlife habitats, natural features of interest in the landscape and sites of archaeological and historic interest.

Extensions to existing mineral workings which minimise environmental disturbance in the countryside will normally be preferred to new workings on green field sites.

Permission for the extraction of peat for sale will only be granted where the proposals are consistent with the protection of boglands valuable to nature conservation interests, and with the protection of landscape quality particularly in Areas of Outstanding Natural Beauty.

Where applicable, measures designed to prevent pollution of rivers, watercourses and ground water should be included in applications for mineral extraction and processing plant, including settlement ponds. The provision of reliable protective measures will be an important factor in assessing the acceptability of the extraction proposal.

Dear Sir or Madam,

Planning Application at Land Adj To Asda Wolverhampton Road Oldbury

Application reference no: DC/19/63297

I have received a planning application from Canmoor (Oldbury) Ltd for Proposed development to provide 2 No. units comprising of Industrial process (Class B1c), General Industrial (Class B2), Storage or Distribution (Class B8) with ancillary offices, car parking, landscaping, service yard areas, and associated external works. I am writing to let you know as a neighbour.

Applications are available to view online, along with the ability to submit your comments by using the Council's website (www.sandwell.gov.uk).

A guide to commenting on planning applications and the decision process is available on-line. Observations must be made on-line or in writing by **15th August 2019**.

Please be aware that due to the law, comments made about an application must be made available for public viewing.

Unfortunately, as we receive a very large number of emails and letters we cannot acknowledge them or enter into correspondence with you about the proposal.

If you wish to meet the case officer you must make an appointment first.

The decision letter will be published in due course on the website.

Yours faithfully,

Amy Harhoff
Director of Regeneration & Growth

2.2 The Proposed Development

The application is for the development of the Site to provide two industrial/commercial units providing a total of 7,503 m² (GIA) for uses B1 c/B2/B8 with ancillary offices and areas for service yards, car parking and landscaping. Unit 1 would provide a total of 4,285 m² (GIA) commercial use while Unit 2 would have a total of 3,218 m² (GIA) of commercial use.

Access to the Site would be via junction 2 of the M5 along the existing ASDA access road, with a new access point off the existing roundabout to the north of the Site.

An indicative layout of the development areas is shown in Figure 2.2.

Dear Sir/Madam,

LAND ADJACENT TO ASDA, OLDBURY

Planning Application submitted via the planning portal (reference PP-07173475)

Full Planning Application for the development of the site to provide two modern employment units of 7,503 sq m (GIA) for flexible employment purposes within use classes B1c/B2/B8 with ancillary offices, car parking, landscaping, service yard areas and ancillary uses as well as associated external works.

This letter accompanies a full planning application for the redevelopment of the site for flexible employment purposes that has been submitted on the planning portal on behalf of Canmoor (Oldbury) Limited.

Payment of the application fee of £31,311.00 has been paid via BACS transfer.

In addition to the required application forms, in accordance with the requirements of the Development Management Procedure Order 2015, the following information has been submitted to support this application:

Reports-

1. 31112-RP-001 Planning Statement
2. 31112-RP-002 Design and Access Statement
3. 31112-RP-003 EIA Annex
4. Transport Assessment
5. Draft Travel Plan
